

# The "Go Green" Scramble

Learn how helping the earth can make you money too!  
Use the word bank & clues below to complete this word scramble.

## Scramble Clues

- \_\_\_\_\_ is using your money to try to make more money.
- Your \_\_\_\_\_ is the money that you invest originally.
- Your \_\_\_\_\_ on an investment is the money you make above and beyond your principal.
- Your \_\_\_\_\_ of return is your return on your investment (or the money that you made on your principal) over a certain period of time.
- The greater the rate of return, the more \_\_\_\_\_ you can make money.
- For a family, business or community, purchasing a \_\_\_\_\_ technology can be an investment.
- Green technologies help the \_\_\_\_\_.
- Green technologies often save \_\_\_\_\_ over the long-term.
- Remember, for a family, business or community, a penny saved is a penny \_\_\_\_\_.
- Let's look at a business. For a business, profits are counted by taking the money the business has earned (revenue) and subtracting the business \_\_\_\_\_.
- Some costs that may be reduced by using green technologies are \_\_\_\_\_ costs such as gas or electricity.
- If a business reduces its costs and keeps the same level of revenue, its \_\_\_\_\_ will increase, which means it is making more money.
- If a family, business or community, invests in a green technology and greatly reduces their costs, they will have a high rate of return on their investment. If they have quickly paid for the \_\_\_\_\_ through their cost savings, 100% of all additional money they save will be a return on their investment.

investing  
money  
earned  
principal  
return  
costs  
rate  
energy  
quickly  
profits  
green  
environment  
technology

## DID YOU KNOW?

**RECYCLING**  
saves energy!

Because of the extra energy that would have been needed to produce NEW cans, recycling 40 aluminum cans saves 1 gallon of gasoline.

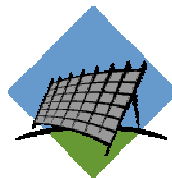

In 2006, recycling aluminum cans saved 15 million barrels of oil! (The Aluminum Association, 2007)
